WORK EXPERIENCE

Software Engineer

Bosch Global Software Technologies

05/2022 - Present Bengaluru, Karnataka, India

Working as an External with CYIENT Company Payroll

Responsibilities

- Currently working as C and C++ Driver Base Developer in Automotive/ADAS Domain.
- As Developer working on project that follows specific process like ASPICE, and guidelines like MISRA, I am responsible for Requirements analysis and gathering, Development, and DevTesting.
- Working experience in CAN Protocol, AUTOSAR DEM, FIM, NVM, knowledge of different System Services and logical layers like BSW, RTE.
- Key skills in the domain include Autosar Diagnostics Stack, COM stack, CAN and Ethernet protocols, and different tools like CANoe, Trace32 debugger, etc.

System Engineer

Tata Consultancy Services

01/2020 - 01/2022 Kolkata, West Bengal, India

Responsibilities

- As a System's engineer, I am responsible for supporting the backend of an e-commerce site.
- Mostly worked in the areas of Unix, SQL, AWS, and tools like Jira, Jenkins. My Skills in the area of Linux came as a great advantage in this journey.
- This is the place where I started my professional career and learned the importance of Soft skills and Team work.

EDUCATION

B.Tech. in Computer Science and Engineering

Aditya Institute of Technology and Management(AITAM), Tekkali

07/2014 - 04/2018 CGPA: 8.03/10

Intermediate(+2), Mathematics, Physics, and Chemistry

Mahendra Junior College, Pathapatnam, Srikakulam

06/2012 - 03/2014 87.4 Percentage

SKILLS

C Programming

C++ Programming

Bash Scripting

Object Oriented Programming Concepts

Network Programming

Linux Internals

Git and Bitbucket

AUTOSAR and ASPICE Process

FreeRTOS

Protocols : CAN, Ethernet, UART, SPI, I2C

GTest framework and Modern CMake

PERSONAL PROJECTS

litecode - A Tree walk interpreter

- An interpreter for a toy language which is dynamically typed, and similar to the family of procedural languages.
- For the first stages or frontend, I have chosen C++ and backend of the interpreter implemented in C.
- Inspired by the book Crafting Interpreters, I have learned a lot of compiler design and system programming topics while working on this project.

Custom Memory Allocator using C

- As a hobby project, Implemented a Memory Allocator using C which can interpret itself.
- This project helped me a lot in understanding how things actually work at system level, different concepts related to System calls in linux.
- Github link:
https://github.com/bhanuprakashheagala/MyCodingProjects/tree/bhanuprakash_eagala/MemoryAllocatorInC.

A BIT MORE

Strong Foundational knowledge in OS, CO&A, Computer Networks, Database concepts, Compiler Design, and Linux. Qualified GATE Computer Science 3 times.

I write tech articles at:
<https://bhanuprakashheagala.hashnode.dev>

My career interests are in the areas of C, C++, Operating Systems(Linux internals), Automotive SW Development, and Network Programming.

Currently exploring C, C++, AUTOSAR, Linux, and RTOS topics.

Certifications in Coursera: IBM Cybersecurity Analyst Specialization, Data structures and Algorithms Specialization from University of California, San Diego
